

MALAAK AL ZOUBI

AI Developer

Ajman, UAE

malaakbalzoubi@gmail.com

<https://www.linkedin.com/in/malaak-al-zoubi/>

<https://github.com/malaakb1>

<https://malaakb.carrd.co/>

A data scientist and artificial intelligence specialist with a solid foundation in machine learning, data analysis, and natural language processing. Eager to apply hands-on project experience and a passion for solving real-world problems to contribute to innovative AI solutions in a professional environment.

EDUCATION

Bachelor of Artificial Intelligence

- Zarqa Private University (Transferred)**
- 94.6% (Excellent)
- Irbid National University**
- 97.1% (Excellent)

June 2023 - Feb 2025

Oct 2021 - July 2023

WORK EXPERIENCE

AI Developer , AI Brains

June 2025 - Present

Working on building smart AI tools using machine learning and Python. Helping the team create useful solutions for real problems. Learning new technologies and improving AI models to make them better and faster.

Fellow, CorrelationOne

Oct 2024 - Feb 2025

- Selected as a Fellow for a competitive technical training program focused on developing advanced skills in data science and AI.
- Applied machine learning and data analytics techniques, including SQL, Excel, Python, and data visualization tools, to solve real-world challenges.

Machine Learning Intern , The Hope International Edu

Sep 2024 - Dec 2024

- Applied Python to develop machine learning models for data analysis and automation tasks.
- Leveraged machine learning techniques to extract insights from data, build predictive models, and optimize processes.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

IBM Professional Certificate in Data Science, Coursera

Sep 2023 - Aug 2024

- Completed a program covering Python, SQL, data analysis, machine learning, and statistics.
- Gained hands-on experience with data manipulation, visualization, and analysis tools.
- Developed a strong understanding of algorithms and machine learning models.

Lecturer , Google Developers Student Club

Oct 2023 - June 2024

- Delivered lectures on Python programming, machine learning, and Arduino to students, enhancing their practical knowledge and skills in AI and automation.
- Guided students in building real-world projects, focusing on practical applications of machine learning and automation using Arduino and Python.

LANGUAGES

- Arabic (Native)
- English (Proficient, IELTS: 7.5)

SOFT SKILLS

- Collaboration and Communication
- Time Management
- Problem Solving
- Leadership

PROJECTS

AI-Powered RAG Assistant for Excellence Awards, AI Brains

Built an intelligent bilingual (AR/EN) chatbot using RAG architecture to help users navigate institutional excellence award criteria. Features real-time streaming, voice interaction, PDF viewer, and multi-category document search. Tech: Python, Flask, LangChain, FAISS, OpenAI APIs.

Tashrea Assistant — AI-Powered Legislative Analysis Platform, AI Brains

Built a FastAPI backend for AI-driven legal text analysis. Extracts articles from PDFs via OCR, compares them article-by-article across jurisdictions using Gemini AI, and generates drafting suggestions with constitutional review. Includes a deep search engine with bilingual query expansion, an Azure OpenAI chatbot, and an AI-powered file classification pipeline routing documents to Azure Blob Storage.

Food Prices in Syria During the Conflict — EDA & Visualization

Analyzed WFP Syria food price data (2011–2017): cleaned and prepared the dataset, engineered time/price features, and visualized commodity price trends and high-cost items using Python (plus a Tableau dashboard).

Music Genre Classification — ML Pipeline on Spotify Audio Features

Built a scikit-learn pipeline to classify tracks using Spotify-style audio features + metadata (~14,396 training rows; 3,600 test rows): handled missing values, one-hot encoded artist names, standardized numeric features, and trained a Random Forest baseline, plus an ensemble (RF/GB/ExtraTrees/LogReg) with majority-vote predictions

Salaries Data Analysis — Exploratory Analysis of Employee Compensation

Conducted end-to-end EDA on a 148,654-record public salary dataset: cleaned and standardized fields (handled missingness and removed non-informative columns), produced role-level compensation summaries, quantified relationships between pay components and total compensation, and delivered clear visualizations of salary distributions and drivers using Python (pandas, matplotlib).

Diamond Price Prediction (XGBoost) — Regression Modeling & Hyperparameter Tuning

Developed a price-prediction model for diamonds using Python: cleaned the dataset by removing invalid zero-dimension records, engineered a size/volume feature ($x \cdot y \cdot z$), applied ordinal/label encoding and feature scaling, benchmarked multiple regressors, and tuned an XGBoost model with cross-validation/GridSearchCV; generated final price predictions for the test set (10,788 rows).

GRADUATION PROJECT

TransformMe AI

TransformMe is an AI-powered photo editing tool that automates the masking process by integrating advanced models from Hugging Face and Stable Diffusion. It provides a powerful solution for high-quality, efficient edits through a simple and intuitive interface developed with Gradio.

CERTIFICATES

- n8n Level 1 & 2 (n8n, 2025) 
- Prompt Engineering for ChatGPT (Vanderbilt University, 2025) 
- Green Digital and Opportunities of AI Program (INCO, 2025) 
- Supervised Machine Learning: Regression and Classification (Stanford University / Coursera, 2025) 
- Introducing Generative AI with AWS (Udacity, 2025) 
- Advanced PowerBi (The Hope, 2025) 

COMPETITIONS AND PRIZES

Tasreefah.com , Co-Founded	Jan 2024 - Sep 2024
Co-led <u>Tasreefah</u> , an award-winning tech startup that reduces food waste through a marketplace for near-expiry products. I led the business model creation, secured key partnerships, and guided platform development, resulting in our solution winning funding at the 2024 Food Waste Hackathon sponsored by the World Food Programme (WFP).	

VOLUNTEERING EXPERIENCE

Field Specialist , Molham Volunteering Team	Nov 2024 - Mar 2025
- Assisting in the sponsorship and support of orphans, ensuring their basic needs are met and well-being is maintained. Monitoring and evaluating medical sponsorships, ensuring that beneficiaries receive appropriate - healthcare and treatment.	
Arduino Instructor, Nahno	Aug 2023 - Dec 2023
Delivered lectures and hands-on Arduino workshops for orphaned children from low-income backgrounds. The sessions covered. The fundamentals of designing and implementing electronics projects, where I guided participants through creating interactive devices using sensors, motors, and other components.
